

To Peter & the team at Willetton Cabinets,

Since our kitchen renovation was completed, there's not a day that's gone by where Darren and I haven't discussed the incredible transformation that's taken place in our home and the additional space and functionality that's been created.

We truly feel we've not only added value to our home, but most importantly to us, is that we've bought our young family many more years of living here as a result of doing the renovation.

As you know, with having two young boys, we had decided to move out while the renovation was being done. I felt at ease everyday knowing that such a high level of care was been taken in our house by an incredible team of people that worked so seamlessly together.

From the minute you first measured up our kitchen, to us receiving your thorough quote and work schedule (which left us with no questions unanswered!), to the constant communication between us during every stage of the renovation right through to the final cleaning day, we honestly can not fault a single detail. The level of professionalism from yourself and all of the associated trades was exceptional.

It's fair to say you and your team are not only in the business of renovations but also in making dreams become a reality and we can't thank you enough!

Natalie & Darren Jones
