

We had been waiting 22 years to upgrade our kitchen and the time had finally come - our project was a bit unique as we have a 1948 home and we had decided to knock out a wall/chimney and double the size of our kitchen (plus other structural work) - we were recommended to Willetton Cabinets by my husbands work colleague - the whole process has been seamless from the beginning with Mark coming to help us with design, by listening and understanding our brief, with the end result completely fitting our expectations (and more!). Selections of fitout, project scheduling and installation were effortless. Both Mark and Peter are perfectionists in what they deliver, and have an excellent team, that were respectful of us living there during the build. We couldn't be happier with the end result. I'm still discovering "little extras" that I didn't even expect :-). Would thoroughly recommend Willetton Cabinets.
